

Special points of interest:

- MATIS Business Improvement
- Relegen wins large AASSPO job
- Rio Tinto relationships continue to flourish
- HMAS Sydney Load Trials continue
- International Exposure Growing

Current Activities

Pacific 2010

Interest in demonstrations of the baseLINE framework at Relegen's Pacific 2010 stand was great, with the large Apple monitors capturing the eye of many passers-by. Below Relegen MD Paul Bennett demonstrates a capability of the **baseLINE** framework as a Weapons Tracking tool.

Rolls Royce Australia

The bonds between Rolls Royce Australia and Relegen have been re-affirmed and strengthened with Walter Hoegge taking up a position on the water-front in support of Rolls Royce Australia. Relegen are proud of the quality of work our members provide into such highly regarded professional organizations such as Rolls Royce and look forward to continuing to grow and strengthen our relationship.

MATIS Panel

The Deed for the MATIS Panel membership has now been received, signed and returned to the MATIS Business Improvement Team. Relegen MD Paul Bennett is travelling the Melbourne late February, meeting with the MATIS Director to discuss the finer points of what this panel membership means and some value-add services that Relegen and **baseLINE** may be able to contribute to the Business Transformation Process.

AASSPO Mandatory Planned Maintenance Inspection task

Relegen is very pleased to have won the contract to perform the Rectification of MPMI Data in CMT and AMPS for the Amphibious Afloat Support System Program Office (AASSPO). The task comprises five phases, including data cleansing and alignment of all MPMI data from the ship sets of HMA Ships TOBRUK, SUCCESS, MANOORA and KANIMBLA, conduct of physical audits on all

four platforms and development and conduct of training for ships staff on the use of the Configuration Item module in AMPS to help maintain the data sets delivered to the ships as a deliverable from this tasking.

RIO Tinto West Angelas

Relegen recently delivered the System Requirements Specification to Rio's West Angelas Health and Safety Division. The SRS details the method in which **baseLINE** shall be implemented to manage Drug and Alcohol testing, general selected assessments, and Emergency Medical Office processes. This document additionally includes enhancements to the previously developed and demonstrated Vehicle monitoring processes. Relegen is pleased to be able to deliver a high level of support to Rio Tinto's Australian operation.

RIO Tinto Supplier Recognition Awards

Rio held their annual Supplier Recognition Program award ceremony and dinner this month. While Relegen did not take out the top award for the year, we are still very happy to make the top-ten list for a second year running.

baseLINE TDMS

February sees the final training effort on HMAS NEWCASTLE, the last of the FFG class of ship to have Relegen's Transactional Data Management System installed. Relegen's **baseLINE** TDMS is now installed and operational on the whole class including four Guided Missile Frigates and the FFG Trainer Facility at Garden Island.

Australian Customs Service

Relegen received from ACS this month the draft contract to provide On-Site representation for ACS for the evaluation and conversion of a civilian maritime vessel into a Customs vessel suitable for conducting Southern Ocean Maritime Patrol and Response Capability (SOMPARC) duties. This is another great win for Relegen and the culmination of 8 months work with ACS.

Current Activities

(Continued from page 1)

Mozambique Government

The Government in Maputo has been in contact with Relegen through one of our esteemed partners, looking to us to implement **baseLINE** as a weapons tracking tool for their armed forces.

Policía Federal Preventiva

A garment manufacturer in Mexico has established contact with Relegen through one of our esteemed partners to provide through the use of **baseLINE**, asset tracking of garments they produce. Issued to the Mexican Police there is a large theft issue of Police uniforms by the drug cartels and there is a need to stymie this loss and control their assets. Relegen's **baseLINE** is a clear choice for this purpose as this is a business need the framework is already being used for several other applications.

baseLINE Weapon Tracking

Increasingly Relegen is being exposed to a need to track and maintain historical information on an array of military, paramilitary and civilian law enforcement articles such as hand guns, restraints, body armour and protective equipment. Relegen has recently responded to an EOI from the **Australian Customs Service** to manage weapons tracking of all ACS weapons, restraints and personal protective equipment using **baseLINE**.

The understanding in the market place that **baseLINE** is a true and powerful asset management system is evident and growing as evidenced in the examples described briefly above in both the local, **African** and **Central American** regions; **baseLINE** has established pedigree as a system to track and maintain weapons and other high value assets whatever the business need or context is.

New Office Manager

Relegen has appointed a new Office Manager in Laurel Holterman. Laurel starts at Mona Vale on Monday the 22nd of February and we all join in wishing Laurel well as she joins the team. Laurel can be contacted on 02 9998 9000.

HMAS SYDNEY Load Trials

Relegen's efforts in conduct of the Load Trials on HMAS SYDNEY, while interrupted by the December Stand-down period and other circumstances beyond our control are now continuing in earnest with SSDG #1 complete, SSDG #3 well underway and SSDG #2 and #4 due to be trialed in the coming weeks.
